On arriving at Daycare to pick up the boys the staff were at pains to tell me that Luke had focussed for 45 minutes on a particular puzzle (shape sorter). I was a little dismissive. We have noticed that when he is not demanding to watch TV Luke is able to concentrate well and his concentration has been commented on before by the other daycare but it was when the staff told me that a long concentration span for children his age was 5 - 10 minutes I realised that this is a particular strength of Luke's.
